

**Editor's Comment:**

The reviews all gave high marks to the paper so it could be published.

One thing though is that the 5th fundamental interaction is still a controversial topic, perhaps the author can mention that in the abstract.

The sentence is:

Previously a hypothesis of the existence of yet another, fifth fundamental interaction, in addition to the strong/weak nuclear, electromagnetic, and gravitational interactions, was introduced to explain this anomaly.

maybe something like:

A recent hypothesis of the existence of yet another, fifth fundamental interaction by Feng et al, in addition to the strong/weak nuclear, electromagnetic, and gravitational interactions, might be introduced to explain this anomaly.
