

Editor's Comment:

The paper referenced below as 2017/PSIJ/36555 "Structural and solvent dependence of the electronic properties and corrosion inhibitive potentials of 1,3,4-thiadiazole and its substituted derivatives- a theoretical investigation" is indeed as a near final form for publication. I only see that the authors did not include in the ref. list the paper by M. Bourass et al. that a referee had listed as a useful reading for the authors. Once the ref. added in the text and in the ref. list, the paper can be published.
