

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_30319
Title of the Manuscript:	Multifractal Analysis of Sunspot Numbers During The Solar Cycle 23 and Ascending Phase of Cycle 24
Type of Article:	Original Research Paper

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have corrected the majority of our suggested points. But they still have to correct some. E.g. (1) they changed the title of the paper, without any notice to the editors! What is "Multiracial" Analysis?? Do they mean "Multifractal" Analysis? (2) They didn't describe more analytically the Figures! (3) They have still several grammatical and syntax mistakes, which have to be corrected. (4) They have totally rejected all (5) suggested References, although they say that they have arranged it. (5) The authors didn't change or include the SIDC website, which provides the most accurate and recently corrected sunspots number. (6) They have corrected accordingly to our suggestions the majority of the References in the text, but in some paragraphs they still write the References in the old-wrong way (7) And they still use both words: Multifractality AND Multifractility. Which one is the proper one? Multifractality is correct	It just a printing mistake. Now We have corrected it. We have given sufficient explanation of figure which is necessary in present paper context. We have corrected the entire mistake accordingly. Now we have included all the references suggested by respected reviewer. We have made corrections accordingly. We have made all the correction. Multifractality is correct. Now we made use it properly in the manuscript.
