SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The paper deserves several corrections based on English spelling and style. Very often, the work is badly presented and hard to be understood. A severe revision is essential, for a better presentation of the whole work. Moreover, it is essential that some additional examples are reported since the application of the whole method seems to be unclear to readers, especially for what concerns the possible consequences on present-time experiments. After those changes the paper will be ready for publication and I do not need to see again the manuscript.	Unfortunately, the paper is the shortned version of a wider one (arXiv) so that is a little bit synthetic. Typos have been corrected and text has been added to make more clear the manuscript. An appendix has been added to make more clear the paper.
Optional/General comments
