**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	The author considers toy model of quantum cosmology. The consideration is done on the basis of qualitative assumptions only. Any physical investigation should be based on some physical fundamental equations. Unfortunately I don't see any such equation in the paper. All results are based on the assumptions.	I humbly request you to kindly see the modified abstract. It is self explanatory.
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
