

Reviewer's Comments:

Otherwise acceptable, but

1. The figures are still not good enough. Please, correct as I instructed last time, that is, take a look at publications. Labels are crowded and vertical lines should be taken away. The figures ought to have frames.
2. Do not use bold face to emphasize your points, because the bold face is used for headings.

Author's Feedback:

Changes made:

1. Simplified the first para of introduction.
2. We removed the text connected with cosmic rotation.
3. Reduced the number of decimal places with approximations.
4. Removed three tables.
