SDI Review Form 1.6

**PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	<p>As is stated in the abstract it resents the performance analysis of different basic techniques used for the image restoration. In fact, it main discusses the technology of image enhancement. Especially in the part of the experiment, there is not noise in the test image visually, moreover, it only runs experiment on an image, and there is not objective evaluation criterion for the experiment. Thus the result is not so credible.</p> <p>Furthermore, as a tool, there is too much discussion of merits of Matlab code and there is too little discussion of the model proposed in the paper.</p>	<p>1- Many images were added, 2- The MATLAB part was enhanced.</p>
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
