

**SDI Review Form 1.6**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	<b>Ms_PSIJ_34187</b>
Title of the Manuscript:	<b>Semi Empirical Model of Global Warming Including Cosmic Forces, Greenhouse Gases, and Volcanic Eruptions</b>
Type of the Article	<b>Original Research Article</b>

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>The manuscript presents a different view of mechanisms that can be forcing the current climate change. This kind of analysis should welcome in the discussion of this important topic.</b>	
<b>Minor</b> REVISION comments	<p>Page , lines 7-8.I understand that the IPCC community run models that considered natural and anthropogenic GHG to simulate the observed (direct and indirect) behaviour of global temperature.</p> <p>Page 4, line 2, change to....and the "increase for the same period" has ....</p> <p>Page 14, line 1, I understand that the climate community, at least in part, related decadal variability (including "decreasing temperature) with the Pacific Decadal Oscillation, a review of this (and others) internal variability should be included somewhere in the introduction or discussion.</p>	<ol style="list-style-type: none"> <li>1. I have added the percentage 97.9 % to show the contribution of GH gases according to IPCC.</li> <li>2. Page 4: I have changed the expression as recommended.</li> <li>3. Page 14: I have added a paragraph into Discussion about the decadal phenomena.</li> </ol>
<b>Optional/General</b> comments
