

Editorial Comments:

One thing though is that the 5th fundamental interaction is still a controversial topic, perhaps the author can mention that in the abstract.

The sentence is:

Previously a hypothesis of the existence of yet another, fifth fundamental interaction, in addition to the strong/weak nuclear, electromagnetic, and gravitational interactions, was introduced to explain this anomaly.

maybe something like:

A recent hypothesis of the existence of yet another, fifth fundamental interaction by Feng et al, in addition to the strong/weak nuclear, electromagnetic, and gravitational interactions, might be introduced to explain this anomaly.

Author's Feedback:

Thank you very much. I agree with this comment.

I want to note that I added one more sentence to the text of the article (lines 611-613)
