

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_36390
Title of the Manuscript:	Fundamental Acoustic Wave Generation in Crystalline Organic Conductors with Two Conducting Channels
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The paper presents new and very important results for acoustic waves anisotropic generation in layered organic conductors by high frequency electromagnetic fields. A mechanism of acoustic waves generation by thermoelectric forces was studied and showed no trivial results. The paper is recommended for publishing.	OK
<u>Minor</u> REVISION comments	Line 76: through instead of trough	OK
<u>Optional/General</u> comments	The paper is of high quality and is recommended for publishing.	OK
