

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_38034
Title of the Manuscript:	Arbitrary l-state Solution of the Schrodinger Equation for q-deformed attractive radial plus Coulomb-like Molecular Potential within the framework of NU-Method.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>The authors study the Schrodinger equation in 1-dimension for the q-deformed attractive radial plus coulomb-like 6 molecular potential. Also, they discussed the bound states using the parametric Nikiforov-Uvarov (NU) method. The paper is technically correct. The results are true.</p> <p>The weaknesses of the paper as follows should be modified:</p> <p>Item1: Please check whole manuscript for grammatical errors and spelling mistakes.</p> <p>Item2: The abstract should describe the purpose of the research, theoretical basis of the hypotheses, analyses, and implications of the findings.</p>	All necessary corrections effected as recommended
