

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_40026_A
Title of the Manuscript:	Investigation of Field Induced Effect of High Voltage Transmission Line in Calabar South, Nigeria.
Type of Article:	Short Research Articles

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
A good conclusion is essentially important as the rest of the article. A conclusion should conclude all the findings as I have stated in previous comment (for example results from Fig.2 was not discussed) and do provide a specific recommendation which could have been taken into consideration for future. This conclusion for example clearance height could be taken from findings or from National standard reference. I suggest again to send for proof reading.	The conclusion has been re-written to include findings in fig. 2. Also specific recommendations have been given with respect to ICNIRP standards. Thanks for all the comments
