

SDI Review Form 1.6

Journal Name:	<u>Physical Science International Journal</u>
Manuscript Number:	Ms_PSIJ_34187
Title of the Manuscript:	Semi Empirical Model of Global Warming Including Cosmic Forces, Greenhouse Gases, and Volcanic Eruptions
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript presents a different view of mechanisms that can be forcing the current climate change. This kind of analysis should welcome in the discussion of this important topic.	
Minor REVISION comments	Page , lines 7-8.I understand that the IPCC community run models that considered natural and anthropogenic GHG to simulate the observed (direct and indirect) behaviour of global temperature. Page 4, line 2, change to....and the "increase for the same period" has Page 14, line 1, I understand that the climate community, at least in part, related decadal variability (including "decreasing temperature) with the Pacific Decadal Oscillation, a review of this (and others) internal variability should be included somewhere in the introduction or discussion.	
Optional/General comments
