**PART 1:**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	Ms_PSIJ_40026_A
Title of the Manuscript:	Investigation of Field Induced Effect of High Voltage Transmission Line in Calabar South, Nigeria.
Type of Article:	Short Research Articles

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
A good conclusion is essentially important as the rest of the article. A conclusion should conclude all the findings as I have stated in previous comment (for example results from Fig.2 was not discussed) and do provide a specific recommendation which could have been taken into consideration for future. This conclusion for example clearance height could be taken from findings or from National standard reference. I strongly suggest again to send for proof reading.
