

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_36631
Title of the Manuscript:	Analysis of the pollution level and its Variation: A Case Study of some selected sites within Kano State Nigeria
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Questions made in methodology were not corrected and the article misses discussion of results, appearing to be only an observation report in the field. Added to this, study time was only three months, insufficient to draw robust conclusions.	The wavelength of the Heavy Metals used were listed. The reason for selecting the five sites was also mention. The research is restricted to the analysis of the soil site in term of Contamination and pollution level (base on concentration). Values of the parameter is quoted and the parameter for the computation of PLIs are presented and discussed. Three (3) months was use to set the sites (site preparation) and the data was collected in the fourth month (Data collected in the next three months) i.e. Before (February), During (March) and After (April) in 2016.
