

**SDI FINAL EVALUATION FORM 1.1**

**PART 1:**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	Ms_PSIJ_37789
Title of the Manuscript:	Dynamics of low energy gamma rays near ground level during July to September 2017, in São José dos Campos, SP, Brazil
Type of Article:	

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
As for my comment regarding discussion, it does not mean you have to compare your results to the Brazil researchers only; the research is performed also in other countries.	São José dos Campos, SP is located in the tropical region and we are the only group that measure the dynamics of low energy gamma rays near ground level with accurate environmental monitoring in 1 minute! With accurate time, hour or day does not appear clearly the correlation rains / intensity of gamma radiation. Because this comparison was not possible, please send me another possible article if exists in gamma and rainfall 1 minute measurements in long series.
