

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_41666
Title of the Manuscript:	Entropy Is the Sum of Heat Capacities
Type of Article:	Short Communication

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors made some modifications in the manuscript, but the main problem remains unaddressed. It is claimed that Entropy and heat capacity are the same thing, and although the authors inform they never made such claim in their manuscript, it is clear in the title that the claim is made.	I did not claim that Entropy and heat capacity are the same thing. I claimed that Entropy change and heat capacity are the same thing. But I did not say that this is the traditional heat capacity. I introduced another (additional) heat capacity in my paper. This heat capacity does not negate the traditional one. So, Entropy change and this new heat capacity are the same thing. The title is: Entropy Is the Sum of Heat Capacities. Yes, it is the sum (or integral in a continuous case) of these new heat capacities.
