

**SDI FINAL EVALUATION FORM 1.1****PART 1:**

Journal Name:	<a href="#">Physical Science International Journal</a>
Manuscript Number:	Ms_PSIJ_41666
Title of the Manuscript:	Entropy Is the Sum of Heat Capacities
Type of Article:	Short Communication

**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The author(s) made an effort to improve their description of their study. They claim there is "another" heat capacity, what still seems confusing to me, but may avoid some disturbing flaws in the conceptual aspects of the work. But the title is still misleading. I would say the manuscript can be accepted if the title is changes to something as "Entropy as a sum of heat capacities" instead of the current title.</p> <p>The main problem is that a formal similarity between two quantities does not mean, necessarily, that one quantity is the same as the other quantity, and that is what the authors were claiming initially.</p>	<p>I agree. I have changed the title.</p>
