

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_37789
Title of the Manuscript:	Dynamics of low energy gamma rays near ground level during July to September 2017, in São José dos Campos, SP, Brazil.
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper deals with an up-to-date topic presenting interesting results regarding the radioactivity measurements. In my opinion, to have a standard academic structure of the paper, there is a need to revise several parts of the manuscript:</p> <ol style="list-style-type: none"> 1. I propose to remove the conditions of measurements from the Abstract and, on the contrary, to add here some findings. 2. Please remove a date from the title. 3. The objectives of the work should be done at the end of Introduction. 4. All specific information about the measurement should be given in Material and Methods not in Abstract or Results. Please specify the measurement in more detail. 5. I suggest the results of measurement to be given in Bq or another radiological unit. 6. I miss a discussion regarding the other authors or other results. 	
Minor REVISION comments		
Optional/General comments
