PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors present an excellent survey paper. The main goal of this survey is to present an analysis of some features of propagation phenomena observed with a Ku-band signal over earth space path. I would like to suggestions to the authors the following points: <ul style="list-style-type: none"> To provide as better resolution of the figures 1, 2, 3 and 4; The article presents a very good and technical knowledge of the subject, and its main contribution presents a negative result to the frequency re-use in Guinea Savanna region of Nigeria. How the author approaches these dilemmas in terms of infrastructure policies? Could infrastructure policies and investments optimize the current scenario? 	
Minor REVISION comments		
Optional/General comments
