

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_40600
Title of the Manuscript:	Development of Viscosity Measuring Device using Vibrational Technique
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Vibrational viscometers have been used in industry for several decades. Therefore this is not a new concept. The author may claim that, the designed structure is homemade and thus it should be cheaper. In this case the title "<i>Development of Viscosity Measuring Device using Vibrational Technique</i>" should be changed accordingly.</p> <p>It would be better if a cost comparison is done with conventional viscometers. That comparison should be added to the conclusion.</p> <p>If the proposed viscometer is not radically cost effective, there is nothing worth enough for publishing. The article may only be published in proceedings.</p>
