SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_41391
Title of the Manuscript:	(Toy-model) A simple "digital" vacuum composed of space voxels with quantized energetic states
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of 'lack of Novelty', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
Minor REVISION comments		
Optional/General comments	The manuscript duplicates several results of the author's previous publication [5]. Both papers are basically collections of facts and hypotheses. They are difficult to read, especially because formulas and comments are collected tightly as goods in the vault. My positive decision was motivated by the idea that this manuscript should wait for its reader, who eventually can use the data for a new self-consistent theory.	

Reviewer Details:

Name:	Igor Bulyzhenkov Lebedev
Department, University & Country	Physics Institute, Russian Academy of Sciences, Russia
