SCIENCEDOMAIN

Journal Name:	
	Physical Science International Journal
Manuscript Number:	**Ms_PSIJ_43610**
Title of the Manuscript:	
	Solutions of Schrödinger and Klein-Gordon Equations with Hulthen plus Inversely Quadratic Exponential Mie-Type Potential
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline)

PART 1: Review Comments

	Reviewer's comment	Author's comment (*if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here*)
Compulsory REVISION comments	The authors of the article solved Schrodinger and Klien-Gordon equations by using NU method for a new potential and they obtained eigenvalues of energy and corresponding wave functions, then obtained special cases from the present potential and also the energy for different states. Thus, I added some comments to support this paper to ready to publish. 1- I think the ALPHA has unit as ev 2- When we deal with the centrifugal term by defining Greene Aldrich approximation, should take carefully ALPHA*r is small value less more than 1. It is better to plot the present potential when Alpha less than 1 and also r is less than 1.	
Minor REVISION comments	1- Some misprints are found	
Optional/General comments
