

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_44985
Title of the Manuscript:	Determination of reverberation time and sound pressure level of selected lecture halls in University of Agriculture, Makurdi-Benue State, Nigeria.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The main problem of the paper, about including reverberation time measurements at the lecture halls, has not been considered by the authors. I honestly think that this paper cannot be intended as an original academic research one and it should not be published. Looking at Plate 6, I wonder about the use of the clapping disks; I hope the measured sound pressure levels are not obtained with this signal but they refer to background noise in each room.</p> <p>The authors have improved the description of the lecture halls where the work is developed.</p> <p>References to dB B and linear dB are still in the text.</p>
