PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the face of climate change and among many other possibilities of ecosystem modification, it is imperative that works like this one offer an intellectual support so that research in the field of parasitology continues to be explored and increasingly elucidated issues related to the host parasite binomial. In addition, with the relevant population change in search of environment less and less hostile, they favor a migration of biospheres of an ecosystem different from the regions in which they will be received. Congratulations to the authors of the work for receiving a paper whose purpose is to promote research and foster knowledge with public health and epidemiology appropriately for the emergency response and management of environmental issues.	Comment agreed. The work demonstrates the reviewer's observation. No correction required.
Minor REVISION comments	x	
Optional/General comments	x
