

SDI Review Form 1.6

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_43638
Title of the Manuscript:	Optimization of Environmental Conditions for remediation of contaminated water with oil using Placket-Burman Model
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The paper entitled Optimization of Environmental Conditions for remediation of contaminated water with oil using Placket-Burman Model. The MS required the major changes.</p> <ol style="list-style-type: none"> 1. write NaCl instead of NaCL 2. Introduction portion is too short, discuss the statistical approach more 3. Try to cite more reference in introduction portion 4. Please check the media composition; Agar-agar only 5 gm in 1000 ml. is it solidify the medium?? Please rewrite the media preparation section. 5. Have you characterize the diesel oil? Which type of compounds present in diesel oil. 6. Incorporate the Microscopic image of <i>A. niger</i>. 7. Please clarify the which software was used for the placket Burman design.?? 8. Explain the analytical methods for degradation of diesel oil. 9. Discuss the Incubation time and conditions. 10. Results and discussion explain very shallow in required rewrite 11. Incorporate new research article related to degradation aspects. 12. Rewrite conclusion with futuristic map 	<ol style="list-style-type: none"> 1- Ok 2- The statistical approach was discussed in materials & methods 3- Ok we added more references 4- we used media in a solid case 5- no, but using as a total and only calculate the removal percent 6- no images were taken 7- it is an experimental model, not a software model 8- it was explained in section 2.4 9- it was explained in section 2.2 10- there is no more citations in this part 11-ok 12-ok
Minor REVISION comments
