SDI Review Form 1.6

Journal Name:	**South Asian Journal of Research in Microbiology**
Manuscript Number:	**Ms_SAJRM_42936**
Title of the Manuscript:	**Cryptococcus neoformans – New science for discovering melanin modifiers**
Type of the Article	**Short research article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.
To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments		
Minor REVISION comments	The manuscript presents interesting results on melanin. It was a pleasure to review this work. Additionally, the English language is clear and the results were described according to the expected. In order to increase the quality of the manuscript, see below some suggestions: In the line 55 insert the numbers in each chemical formula as subscript. Please, instead "L-dopa", the correct form is "L-DOPA" (lines 56, 70, 92). Please, provide the chemical structure for niacinamide. Please, change "invitro" for "*in vitro*" (lines 101, 104 and 117). Please, provide the Conclusion section. In order to increase the discussion, I suggest that the authors explore the results by theoretical calculations, such as molecular docking (see the main target of the tested molecule).	
Optional/General comments
