

Editor's Comment:

The paper need more work in some sections: the short introduction need a adequate dimension, with a clarification of the objectives of the paper. The health status indicator probably is a very short section; an adequate option is turn it into a subsection of constraints to achieving section. Please rename the last section as: Discussion and conclusion: Health care expenditure and economic growth, and delete the subsection title conclusion. The references section, please deletes the section additional references, or quoted in the text and cites them in the list of references.
