

SDI Review Form 1.6

Journal Name:	South Asian Research Journal of Natural Products
Manuscript Number:	Ms_SARJNP_39334
Title of the Manuscript:	Phytochemical Constituents and Phenolic Content of Methanol and Aqueous Extracts of Dissotis rotundifolia whole plant
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	- Introduction section: The authors must give more information about the studied plant with references. There is no reference in the last paragraph of introduction section. - Results section: In Table 1, the authors should report phytochemical screening results in +, ++, +++, ++++ according to the change in color of reaction which appeared. This may help in comparison between methanol and aqueous extracts. - Figure 1 is a standard curve of gallic acid. Please change the x-axis to be "concentration of gallic acid (mg/ml)". The figure legend must also be changed to "standard curve for total phenolic content assay". - Discussion section: Give the reason that methanol was used to compare with aqueous solvent in the extraction process. They are nearly the same polarity. Why the authors did not use the solvents with much more different in polarity?	
Minor REVISION comments		
Optional/General comments	- Check reference format - Check and correct spelling	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
